

This system has been tested and certified by the Water Quality Association according to NSF/ANSI 42, 53, and 401 for the reduction of the substances listed below and NSF/ANSI/CAN 372 for lead free compliance. The concentration of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42, 53, and 401.

:	Substance	Minimum percent reduction	Influent challenge concentration (mg/L unless specified)	Maximum permissible product water concentration or minimum allowable percent reduction (mg/L unless specified)
NSF/ANSI 42	Chlorine, Taste & Odor	99.0%	2.00 ± 10%	> 50% Reduction
Aesthetic Effects	Nominal Particulate, Class I particles 0.5 to < 1µm	99.0%	at least 10,000 particles/mL	> 85% Reduction
	Cyst 99.98% minimum 50,000/L	minimum 50,000/L	99.95%	
NSF/ANSI 53 Health Effects	Turbidity	96.6%	11 ± 1 NTU	0.5 NTU
Tieditii Eileets	VOC Surrogate Test	99.8%	0.300 ± 10%	> 95% Reduction
	Microplastics particles 0.5 to < 1μm	99.0%	at least 10,000 particles/mL	> 85% Reduction
	Microcystin	99.5%	0.004 ± 10%	0.0003
	Meprobamate	96.6%	0.0004 ± 20%	0.00006
	Phenytoin	94.3%	0.0002 ± 20%	0.00003
	Atenolol	94.5%	0.0002 ± 20%	0.00003
	Carbamazepine	96.3%	0.0014 ± 20%	0.0002
	TCEP	99.6%	0.005 ± 20%	0.0007
NSF/ANSI 401	TCPP	99.8%	0.005 ± 20%	0.0007
Emerging Contaminants	DEET	99.3%	0.0014 ± 20%	0.0002
Contamilanto	Metolachlor	99.7%	0.0014 ± 20%	0.0002
	Trimethoprim	95.8%	0.00014 ± 20%	0.00002
	Ibuprofen	95.4%	0.0004 ± 40%	0.00006
	Naproxen	96.5%	0.00014 ± 20%	0.00002
	Estrone	96%	0.00014 ± 20%	0.00002
	Bisphenol A (BPA)	94.7%	0.002 ± 20%	0.0003
	Linuron	92%	0.00014 ± 20%	0.00002
	Nonylphenol	92.7%	0.0014 ± 20%	0.0002

While testing was performed under laboratory conditions, actual performance may vary.

### **Performance Data Sheet**

Rated Capacity	150 gallons (Chlorine independently tested up to 5,000 gallons)	
Min-Max Operating Pressure:	20-120 psi (207 kPa-827 kPa)	
Min-Max Feed Water Temperature	40 °F-100 °F (4.4 °C-37.8 °C)	
Rated Service Flow	0.5 gpm (1.9 LPM)	

- · Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
- Refer to the owners manual for specific installation instructions, manufacturer's limited warranty, user responsibility, and parts and service availability.
- · For parts and service availability, please contact Brondell.
- The estimated replacement time of filter, which is a consumable part, is not an indication of quality guarantee period, but it means the
  ideal time of filter replacement. Accordingly, the estimated time of filter replacement may be shortened in case it is used in an area of
  poor water quality.
- Incidental contaminants are those compounds that have been detected in drinking water supplies at trace levels. While occurring at only trace levels, these compounds can affect the public acceptance/perception of drinking water quality.
- WARNING: This system is for use on water supplies that have been treated to public water systems Standards. This system has been tested to demonstrate effective reduction of microcystins, however, in the event of a reported cyanotoxin event in your water supply, other cyanotoxins may be present in the drinking water which may not be effectively reduced by this system. In the event of a cyanotoxin notification, follow the recommendations of your drinking water authority.
- · Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

Model of Filter	Туре	Usable period	
HF-31	Composite Plus Filter	6 months	
HF-32	Nanotrap Filter	12 months	
HF-33	Carbon Block Filter	6 months

<sup>\*</sup> Chloroform was used as the surrogate chemical for VOC reduction claims

<sup>1</sup> These harmonized values were agreed upon by representatives of USEPA and Health Canada for the purpose of evaluating products to the requirements of this Standard.

Influent challenge levels are average influent concentrations determined in surrogate qualification testing.
 Maximum product water level was not observed but was set at the detection limit of the analysis.
 Maximum product water level is set at a value determined in surrogate qualification testing.

<sup>5</sup> Chemical reduction percent and maximum product water level calculated at chloroform 95% breakthrough point as determined in surrogate qualification testing.

<sup>6</sup> The surrogate test results for heptachlor epoxide demonstrated a 98% reduction. These data were used to calculate an upper occurrence concentration which would produce a maximum product water level at the MCL.

### **Performance Data Sheet**

Cypress Three-Stage Countertop Water Filtration System (H630)

State of California Department of Public Health Water Treatment Device Certificate Number 13-2165 Date Issued: May 21, 2013

Trademark/Model Designation Replacement Elements

Brondell H630 HF-31

HF-32 HF-33

### Manufacturer: Brondell, Inc.

The water treatment device(s) listed on this certificate have met the testing requirements pursuant to Section 116830 of the Health and Safety Code for the following health related contaminants:

### Microbiological Contaminants and Turbidity Inorganic/Radiological Contaminants

Turbidity

### **Organic Contaminants**

Alachlor Endrin

cis-1,3-Dichloropropylene Methoxychlor Xylenes

Dinoseb Pentachlorophenol

Rated Service Capacity: 150 gallons
Rated Service Flow: 0.5 gallons per minute

### Conditions of Certification

Do not use where water is microbiologically unsafe or with water of unknown quality, except that systems for cyst reduction may be used on disinfected waters that contain filterable cysts.
